

Please reject NAB's most recent effort to obtain regulatory protection by artificially restricting programming available over satellite. This is no different than previous efforts to restrict other competitors -cable TV, direct to home satellite broadcasts etc. Please see it for what it is an effort by one industry to protect itself from competition by using the FCC. This is not new, a similar effort delayed the development of cable TV for many years. Fred Finn former counsel to the National Cable Television Association and the Home Satellite Television Association
